PROFESSIONAL SUMMARY

Computer Science professional with experience teaching B.Tech and BCA students and a background in software development and automation. Currently pursuing an M.Tech in Artificial Intelligence and Machine Learning. Interested in teaching computer science, programming, and AI/ML concepts through practical, student-focused learning.

SKILLS

Python · Java · SQL · Machine Learning · Artificial Intelligence

WORK HISTORY

Lecturer
11/2024 - 04/2025

Maharana Institute of Technology & Sciences — Lucknow

- Delivered lectures to B.Tech and BCA students in engineering and technology subjects.
- Prepared lesson plans, study materials, and academic content.
- Evaluated students through examinations, assignments, and viva.
- Mentored students and supported their academic development.
- Maintained an interactive and engaging classroom environment.
- Conducted viva examinations at Babu Banarasi Das National Institute of Technology and Management, Himalayan Institute of Technology and Management (Lucknow), and Institute of Engineering and Technology (Sitapur).

Software Trainee
03/2022 - 03/2023

Miracle Software Systems — Vizianagaram

- Worked as a shadow resource in UiPath Robotic Process Automation (RPA).
- Collaborated with teams to identify automation opportunities and gather requirements.
- Assisted in developing and maintaining automation workflows using UiPath Studio.
- Tested and troubleshot workflows to ensure accuracy and reliability.
- Continuously improved skills in RPA tools and automation techniques.

EDUCATION

M.Tech - AI ML — Birla Institute of Technology, Mesra, Ranchi — 08/2025 - Present

B.Tech - CSE — Visakha Institute of Engineering and Technology - VIET, Visakhapatnam — 07/2017 - 08/2021

Intermediate - MPC — TSR National Junior College, Visakhapatnam — 07/2015 - 05/2017

Matriculation — Ursuline Convent School, Muri — 2015

PROJECTS

- Online Laptop Shop — The Online Laptop Shop aims to create a comprehensive e-commerce platform dedicated to laptops. This platform will provide a user-friendly interface for customers to browse, compare, and purchase laptops.
- Hospital Management Systems — A Hospital Management System (HMS) is like a smart computer program for hospitals. It helps the hospital staff do their jobs better by taking care of many tasks automatically.
- Password Generator — Developed a password generator with customizable password length and special characters. Created a simple command-line interface to generate unique passwords, focusing on security and usability.
- Prediction Of Traffic Accident Severity — This project was basically about predicting any accidents due to weather conditions, road damage, drunk driving, etc. And if any accidents happen it will inform to nearest traffic control for help.

RESEARCH EXPERIENCE-ONGOING

- EEG-Based Cognitive Load Estimation Using Machine Learning — Studying EEG signals to estimate cognitive workload. Exploring machine learning techniques for feature selection and classification. Analyzing feature stability and model performance under noisy conditions.

CERTIFICATIONS

- Python with Django — Hippocloud Academy | October 2021 – February 2022
- C Language Certification — ISO 9001:2015 / UIKAF / AIAB Certified | February 2023 – April 2023
- Java Certification — ISO 9001:2015 / UIKAF / AIAB Certified | April 2023 – June 2023
- Java Full Stack Development — EduBridge Learning Pvt. Ltd. | August 2023 – February 2024

LANGUAGES

- English — Professional working proficiency
- Hindi — Fluent
